Mobile Horizontal Filler Silo

Parker low profile silos are designed for reclaimed or imported filler as self contained units and mounted on running gear; silos are available in two sizes to feed material into the filler weigh hopper via screw conveyors. The unique and innovative design means that it is extremely easy to transport and relocate, complementing the whole reason for a fully mobile asphalt plant.

22m³ Mobile horizontal filler silo for a 160t/h mobile asphalt plant

22m³ Mobile imported filler storage silo

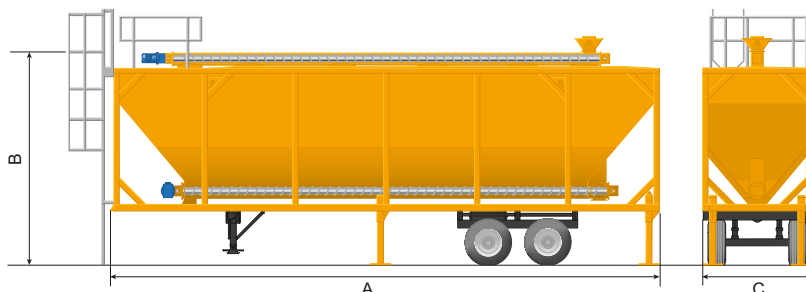

45m³ Mobile reclaimed filler storage silo

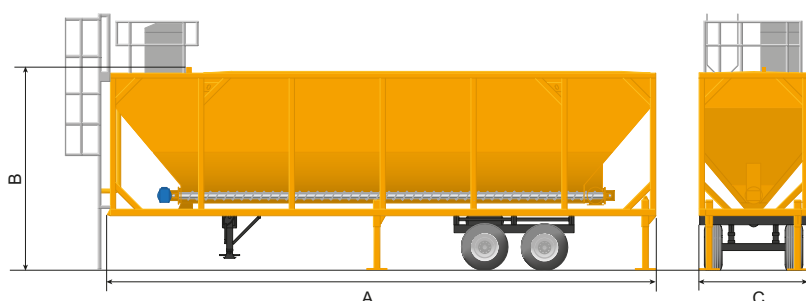

Features:

- 22m³ or 45m³ capacity silos available.
- Compact & low profile design with fast on-site set up.
- No foundations required.
- Reclaimed silo complete with top mounted screw conveyor to distribute filler.
- Imported Silo with reverse air jet filter system.
- High Level Indicator.

45m³ Mobile ~ Reclaimed horizontal filler silo with top mounted screw

45m³ Mobile ~ Imported horizontal filler silo with top mounted Jet Filter
