Parker HI0870 Hook-Lift Impactor Crushing Plant

The HI0870 is a fully transportable hook-lift type primary crushing plant complete with a 800mm diameter x 700mm impactor. The under-frame members are designed to the universal industry standard for hook lift frames [DIN or CHEM Standard] and when off-loaded distributes ground loadings. The straight beam chassis design incorporates access and maintenance platforms to the engine, crusher and feed chute, while the touchscreen control system and wireless remote control provide ease of operation, the versatile HI0870 mobile crushing unit is ideally suited for urban recycling and demolition projects.

Options:

- Bypass Chute

NOTE: Capacities quoted are intended as a guideline only, and are based on a clean, dry graded continuous feed material (weighing 1600kg/m³ (100lb/ft³) and a S.G of 2.7 average), which will readily enter the crusher feed opening without obstruction. Actual capacities can vary considerably from those given, due to the following application and operational factors: 1) **MATERIAL** - Friability & Toughness, 2) **FEED CONDITIONS** - Grading of feed size (Compliance with Euro STD). 3) **INSTALLATION** - Method of feeding, Removal of under size. [Operation at settings outside those stated should be referred to the works].
